Comments on the Postmaster General's Ten Year plan for the USPS

I must protest the terrible destruction of the postal service under Mr DeJoy! Since the founding of our country we've had government postal SERVICE. It is a service that we pay for with our taxes. In the past we've had amazing postal service with very rapid letter and package delivery. Since we all pay taxes, it doesn't need to be an income producing entity. We citizens don't want the post office to be privatized. Government postal service has worked very well. The employees do a great job!

In the past year, for political reasons, the postmaster general set about to destroy the system in order to defeat voting by mail for state and national elections! Shameful things were done! Destroying expensive mail sorters, cutting back working hours of postal employees, cutting back of personnel, removing neighborhood mail boxes! in order to slow down delivery! What kind of government for the people is this? It's criminal!

Although I heard the postmaster general's ten year plan is open for public comments for a month, the setup for making comments is daunting. One has to setup an account, and then submit a pdf file! The site says the "communicate with us" button letters will not be read by the commission! There is no way for a citizen to find the docket number for the plan that is asked for. You are trying to deter comments! My phone and iPad don't produce pdf files. I had to put a word processor on my iPad to send this letter. Disgusting.

Do not accept the ten year postal plan. It is not the will of citizens who wish to continue living under a democracy. The ten year plan is for diminishing the postal SERVICE, and helping to defeat voting by the people. It is a nasty political action.

Sincerely,
Jean Eaton
